Education

21/03 – 26/02 **SahmYook University**, Seoul
(Expected) B.S., Computer Science and Engineering, Software (**GPA: 3.95 /4.5**)

Project

Deep Learning

25/05 **Chest X-ray Pneumonia Detection using Fine-tuning ResNet50, Grad-CAM**
• Improved model accuracy through transfer Learning and Fine-tuning of the ResNet50.
• Visualized lesions using Grad-CAM.

AI-based

25/03 – Present **MindNote: AI-based Emotional Diary and Psychological Analysis Service**
• Developed a web/mobile service that analyzes user diaries using an OpenAI-based LLM.
• Provided personalized sentiment and psychological feedback for mental health support.

25/03 – 25/06 **LLM-Based Sales Conversation Evaluation and Scoring System**
• **Software registration: C-2025-019854**
• Industry-Academia Collaborative Capstone Project.
• Refactored LLM prompts and developed a user interface to ensure consistent and structured output.

25/03 – 25/06 **News.ai: News Summarization and Email Delivery Service using LLM**
• Developed a web-based service that summarizes news articles using an LLM API and a web crawling algorithm, delivers the summaries via email.

SW

24/11 – 24/12 **Pegasus: Java-based SNS**
• Developed a web-based SNS using Java (JSP, Servlets, JDBC, DAO, Ajax), MySQL, HTML, CSS.
• Implemented a WebView-based Android application using Android Studio and Kotlin.

Activities

25/03 – 25/06 **Google Developer Groups on Campus (GDGoC)**
Member, Machine Learning Session

25/03 – 25/06 **On-Campus SW Coding Mentoring Program**
Mentor, Object Oriented Programming (Language: Java)

Award

22/08 **1st Prize**, On-Campus General English Course Review Contest

Programming skills

Languages **Python**, Java
Software/Tools **Tensorflow**, Scikit-learn, OpenCV, VScode, Git, Github

Related Courses

Recent Topics on SW Application II (A+, 24-winter), Probability & Statistics (A+, 24-2), Discrete Mathematics (A, 24-2), Object Oriented Programming II (A, 24-2), Object Oriented Programming I (A, 23-1)

Qualifications

25/01 JLPT N3

Research Interests

Medical AI, ML/DL, XAI, Lightweight AI Models (e.g., Medical applications), Computer Vision, NLP, Sentiment Analysis
