Education

21/03 – 26/02 (Expected)	**Sahmyook University**, Seoul B.S., Computer Science and Engineering, Major in Software **(GPA: 4.0 /4.5)**

Research Experience

25/06 – Present	**Big Data-Driven AI Lab (BIGBASE)**, Seoul National University of Science and Technology Research Intern, Supervised by *Prof. Hyuk-Yoon Kwon*

Projects

Medical Deep Learning

25/06 – Present	**Scalable Multi-Domain Ocular Fundus Image Federated Learning Framework** • Collaborative project by Seoul National University of Science and Technology & the National Medical Center
25/05 – 25/06	**Brain MRI Tumor Detection using DenseNet121, Grad-CAM** • Classified brain MRI images into three tumor types and one normal class using softmax and fine-tuned **DenseNet121** for improved accuracy. • Applied **Grad-CAM** to visualize lesions as part of explainable AI for enhanced medical interpretability.
25/05	**Chest X-ray Pneumonia Detection using Fine-tuned ResNet50, Grad-CAM** • Improved model accuracy through transfer learning and fine-tuning of **ResNet50**. • Visualized lesions using **Grad-CAM**.

AI-based

25/03 – Present	**MindNote: AI-based Emotional Diary and Psychological Analysis Service** • Developed a web/mobile service that analyzes user diaries using an **OpenAI-based LLM**. • Provided personalized sentiment and psychological feedback for mental health support. • Led the project as a Team Leader, managing the full project lifecycle and delivering an AI-driven sentiment analysis system.
25/03 – 25/06	**LLM-Based Sales Conversation Evaluation and Scoring System** • **Software registration: C-2025-019854** • Industry-Academia Collaborative Capstone Project. • Refactored LLM prompts and developed a user interface to ensure consistent and structured output.
25/05 – 25/06	**News.ai: News Summarization and Email Delivery Service using LLM** • Developed a web-based service that summarizes news articles using an **LLM API** and a **web crawling algorithm**, delivers the summaries via email.

SW

24/11 – 24/12	**Pegasus: Java-based SNS** • Developed a web-based SNS using **Java** (JSP, Servlets, JDBC, DAO, Ajax), MySQL, HTML, CSS. • Implemented a WebView-based Android application using Android Studio and **Kotlin**.

Activities

25/03 – 25/06	**On-Campus SW Coding Mentoring Program** **Mentor**, Object Oriented Programming (Language: **Java**)

Awards

22/08	**1st Prize**, On-Campus General English Course Review Contest

Qualifications

25/01	JLPT N3
